pour la Prévention des Risques Naturels*

Collaborations scientifiques

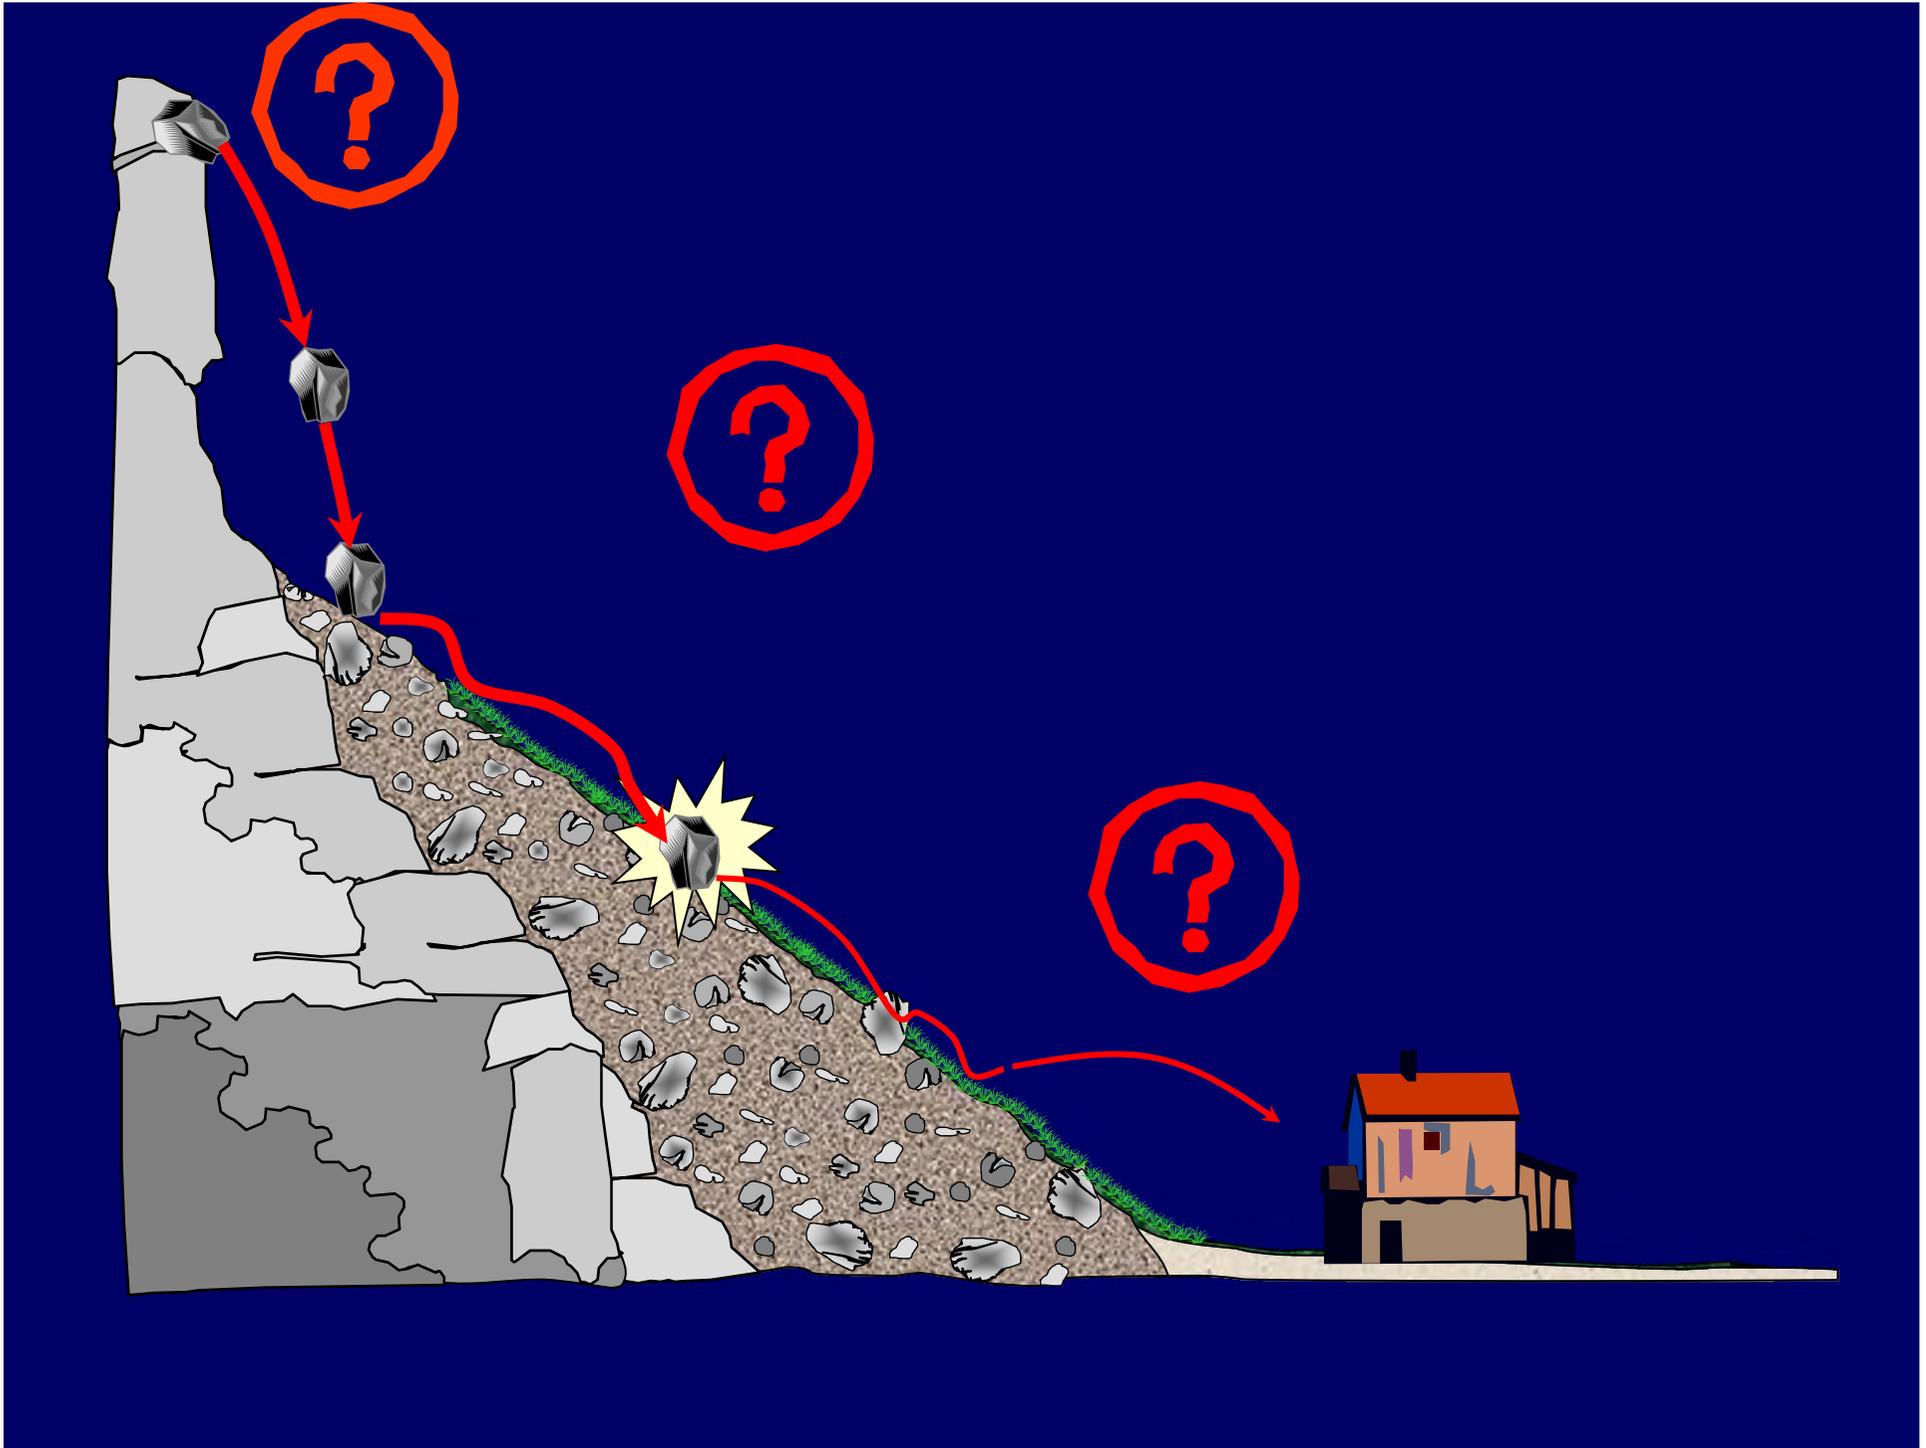

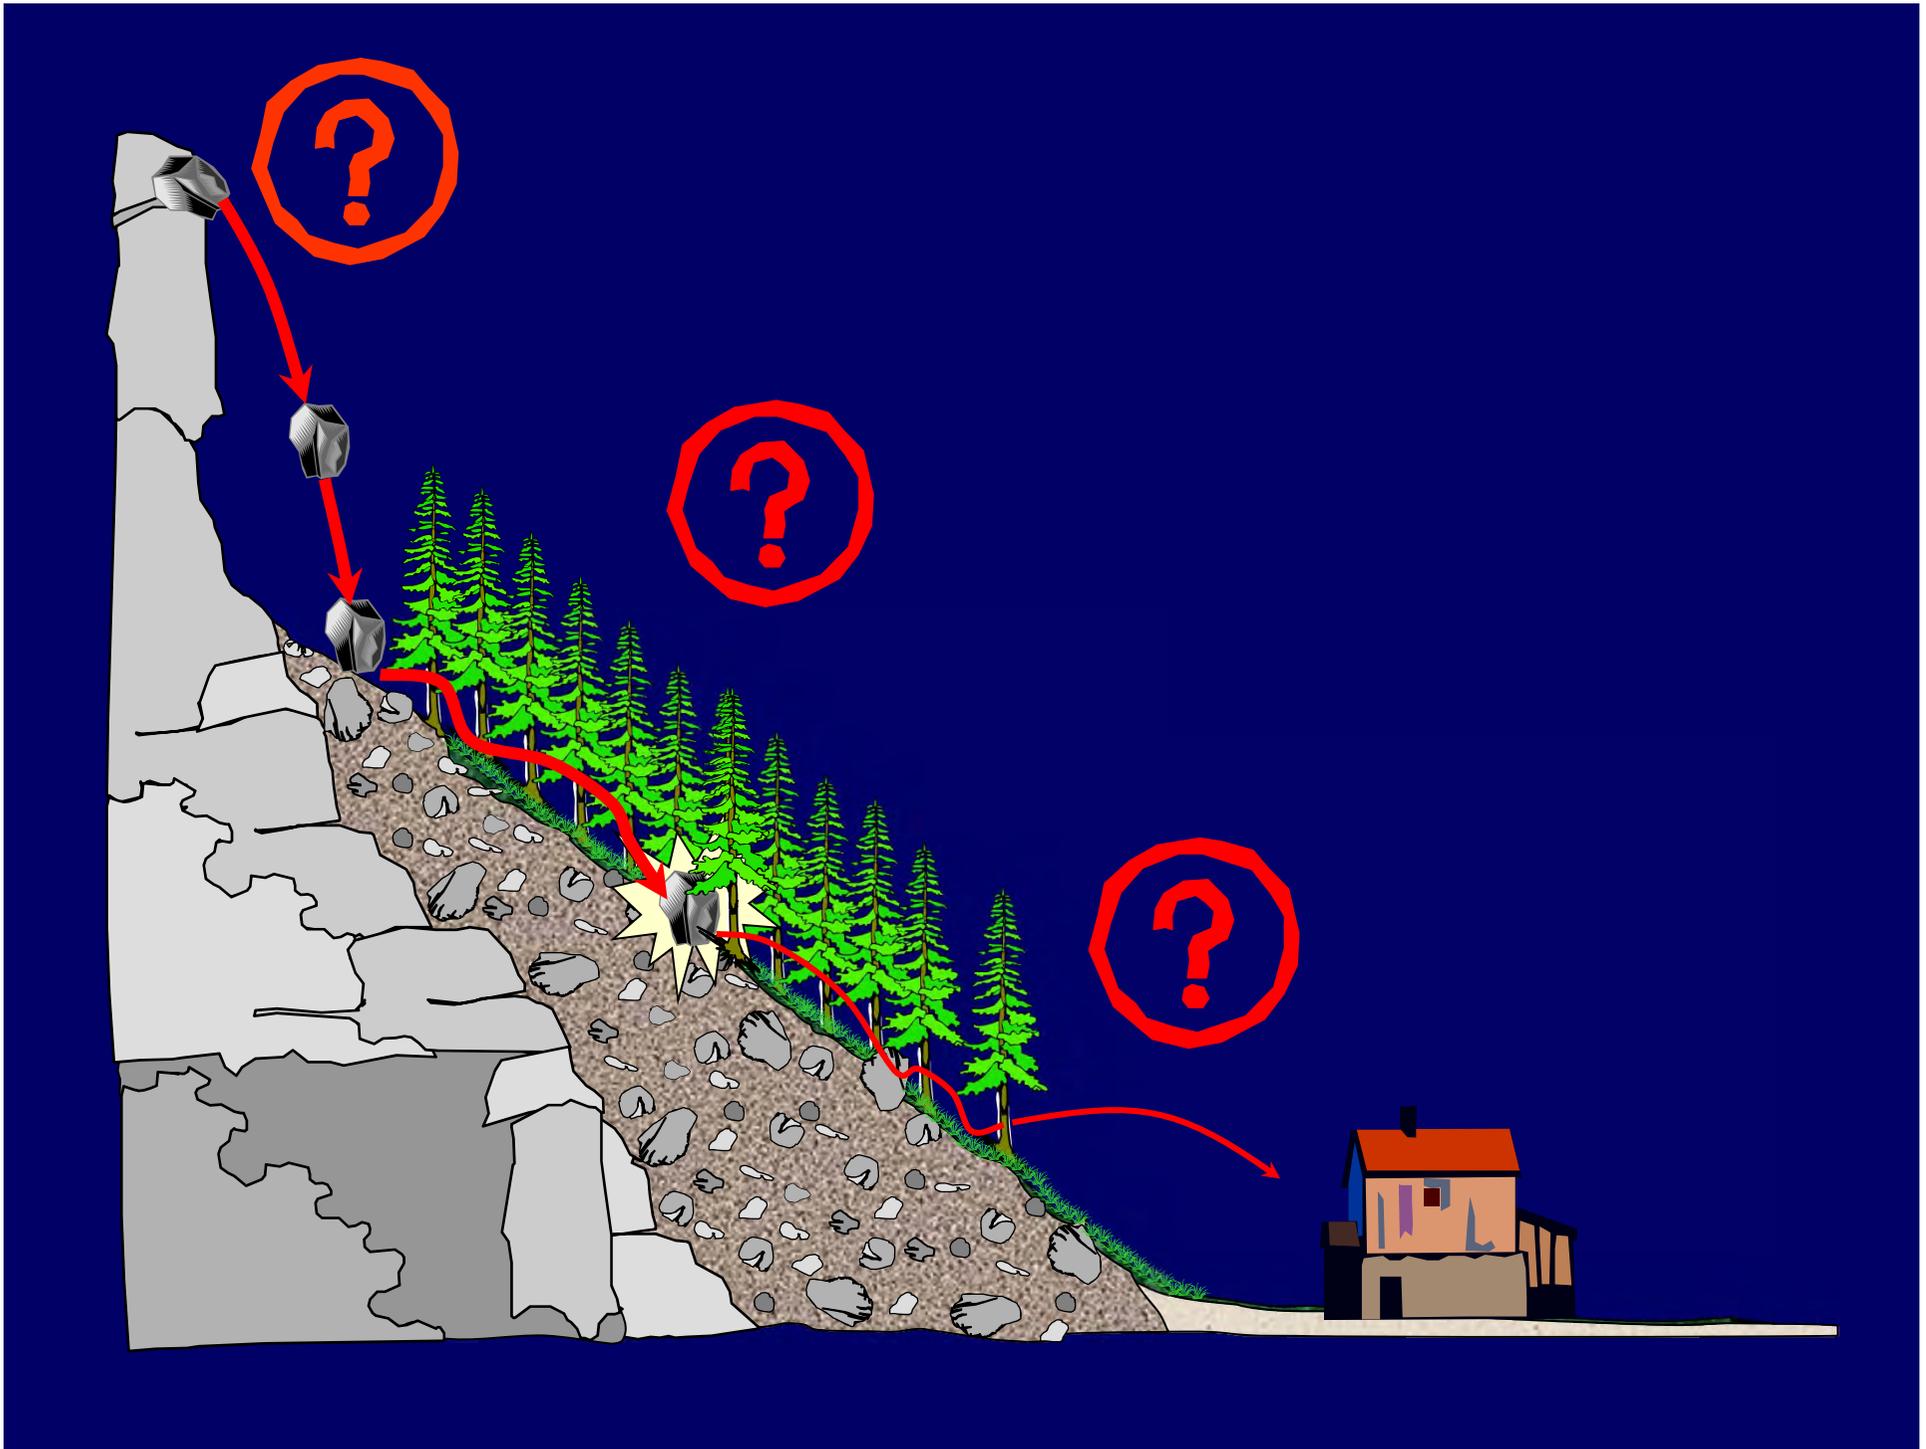

## Du risque naturel.....à la protection

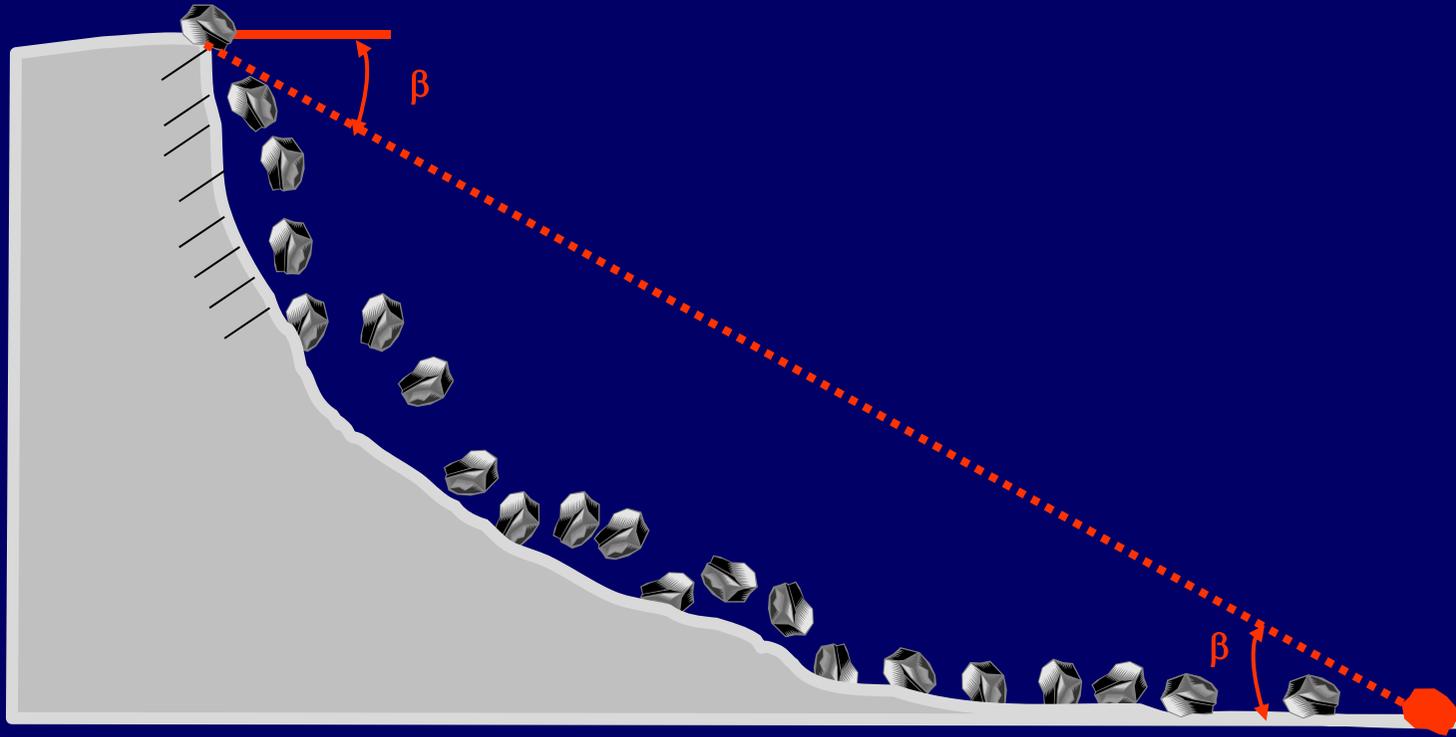

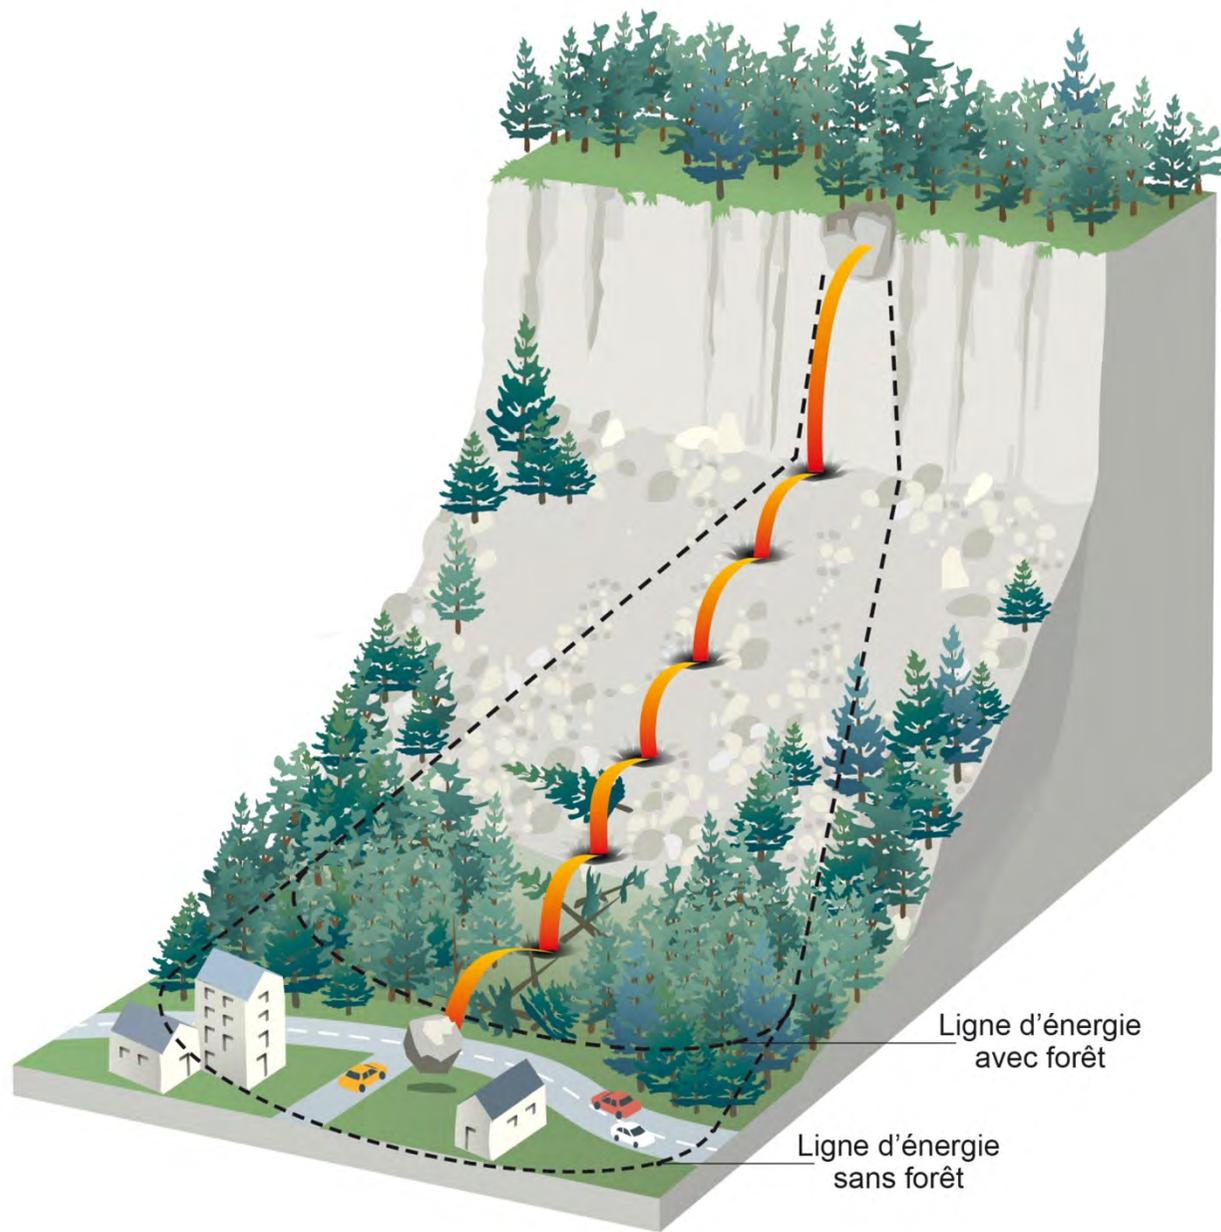

**Génie civil : emmailloter, filet, etc.**

**Génie biologique : gérer au mieux l'existant, reboiser, revégétaliser**

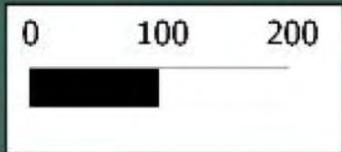

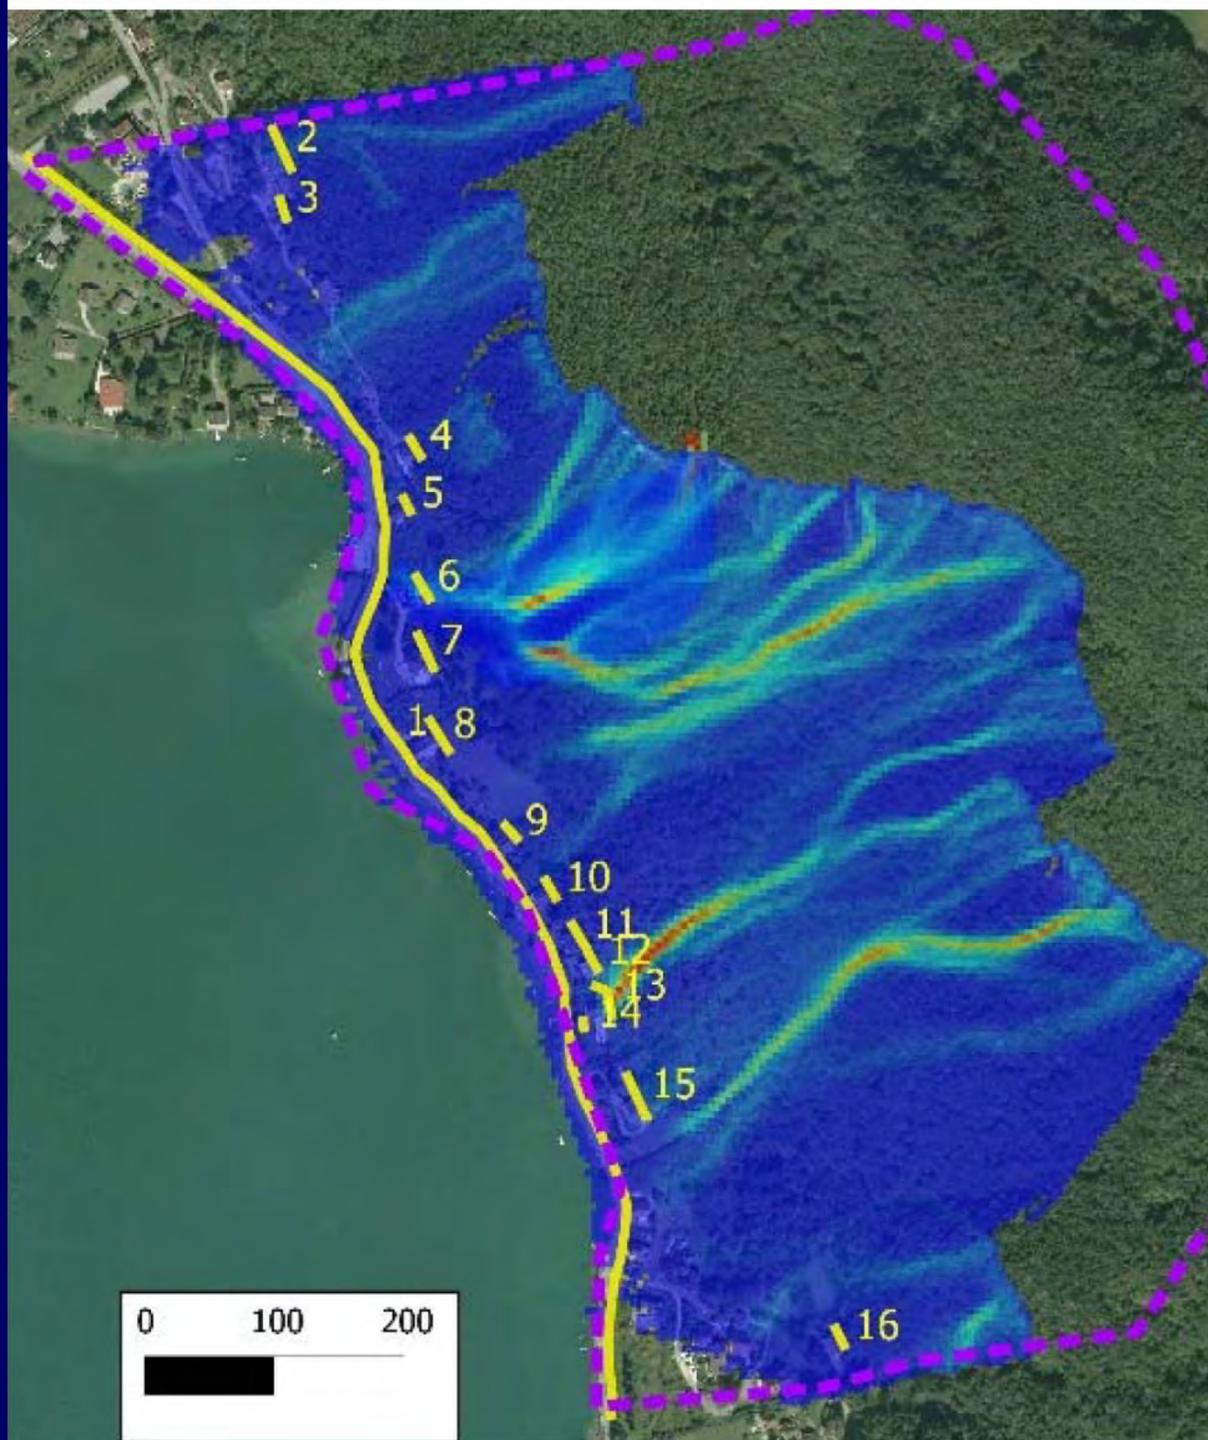

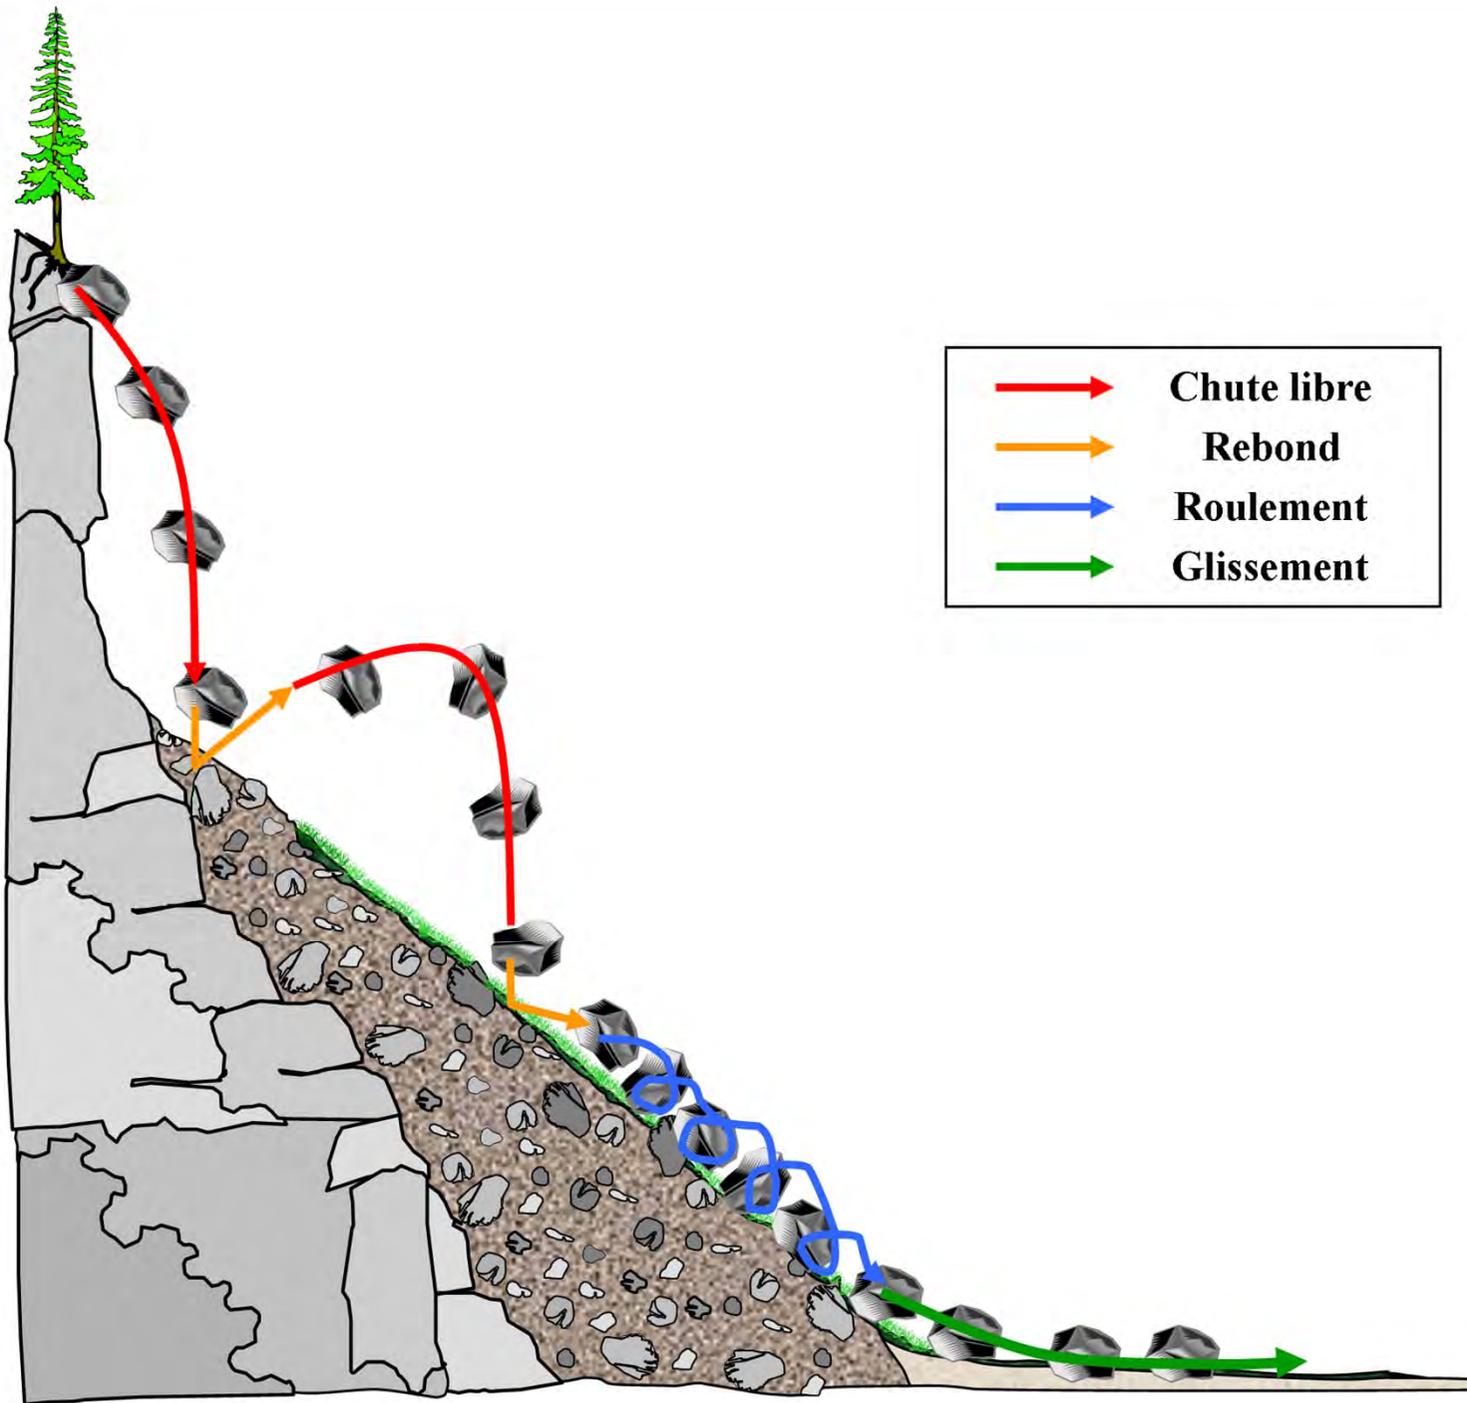

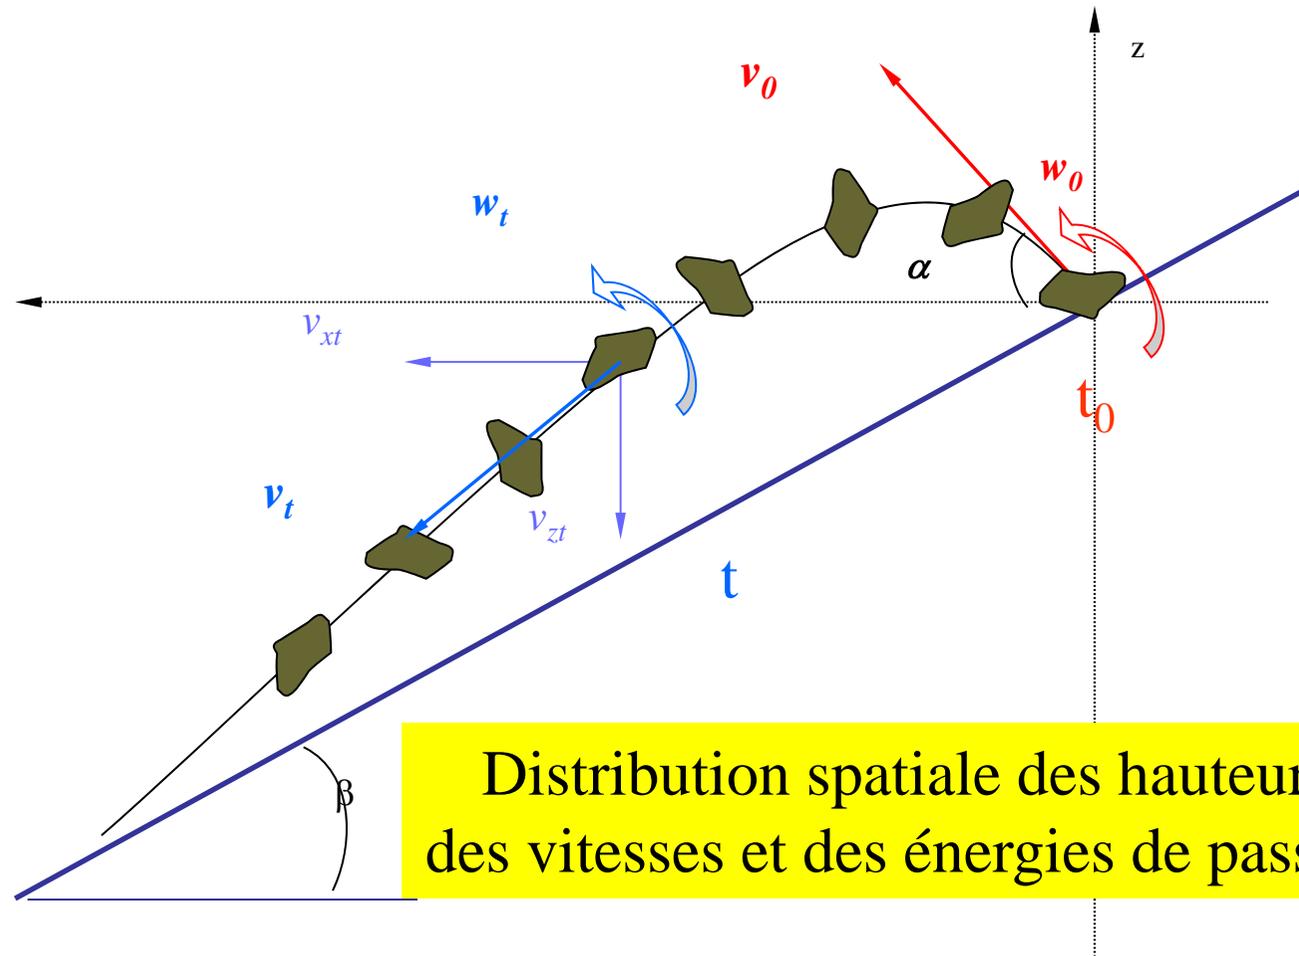

Ligne d'énergie  
avec forêt

Ligne d'énergie  
sans forêt

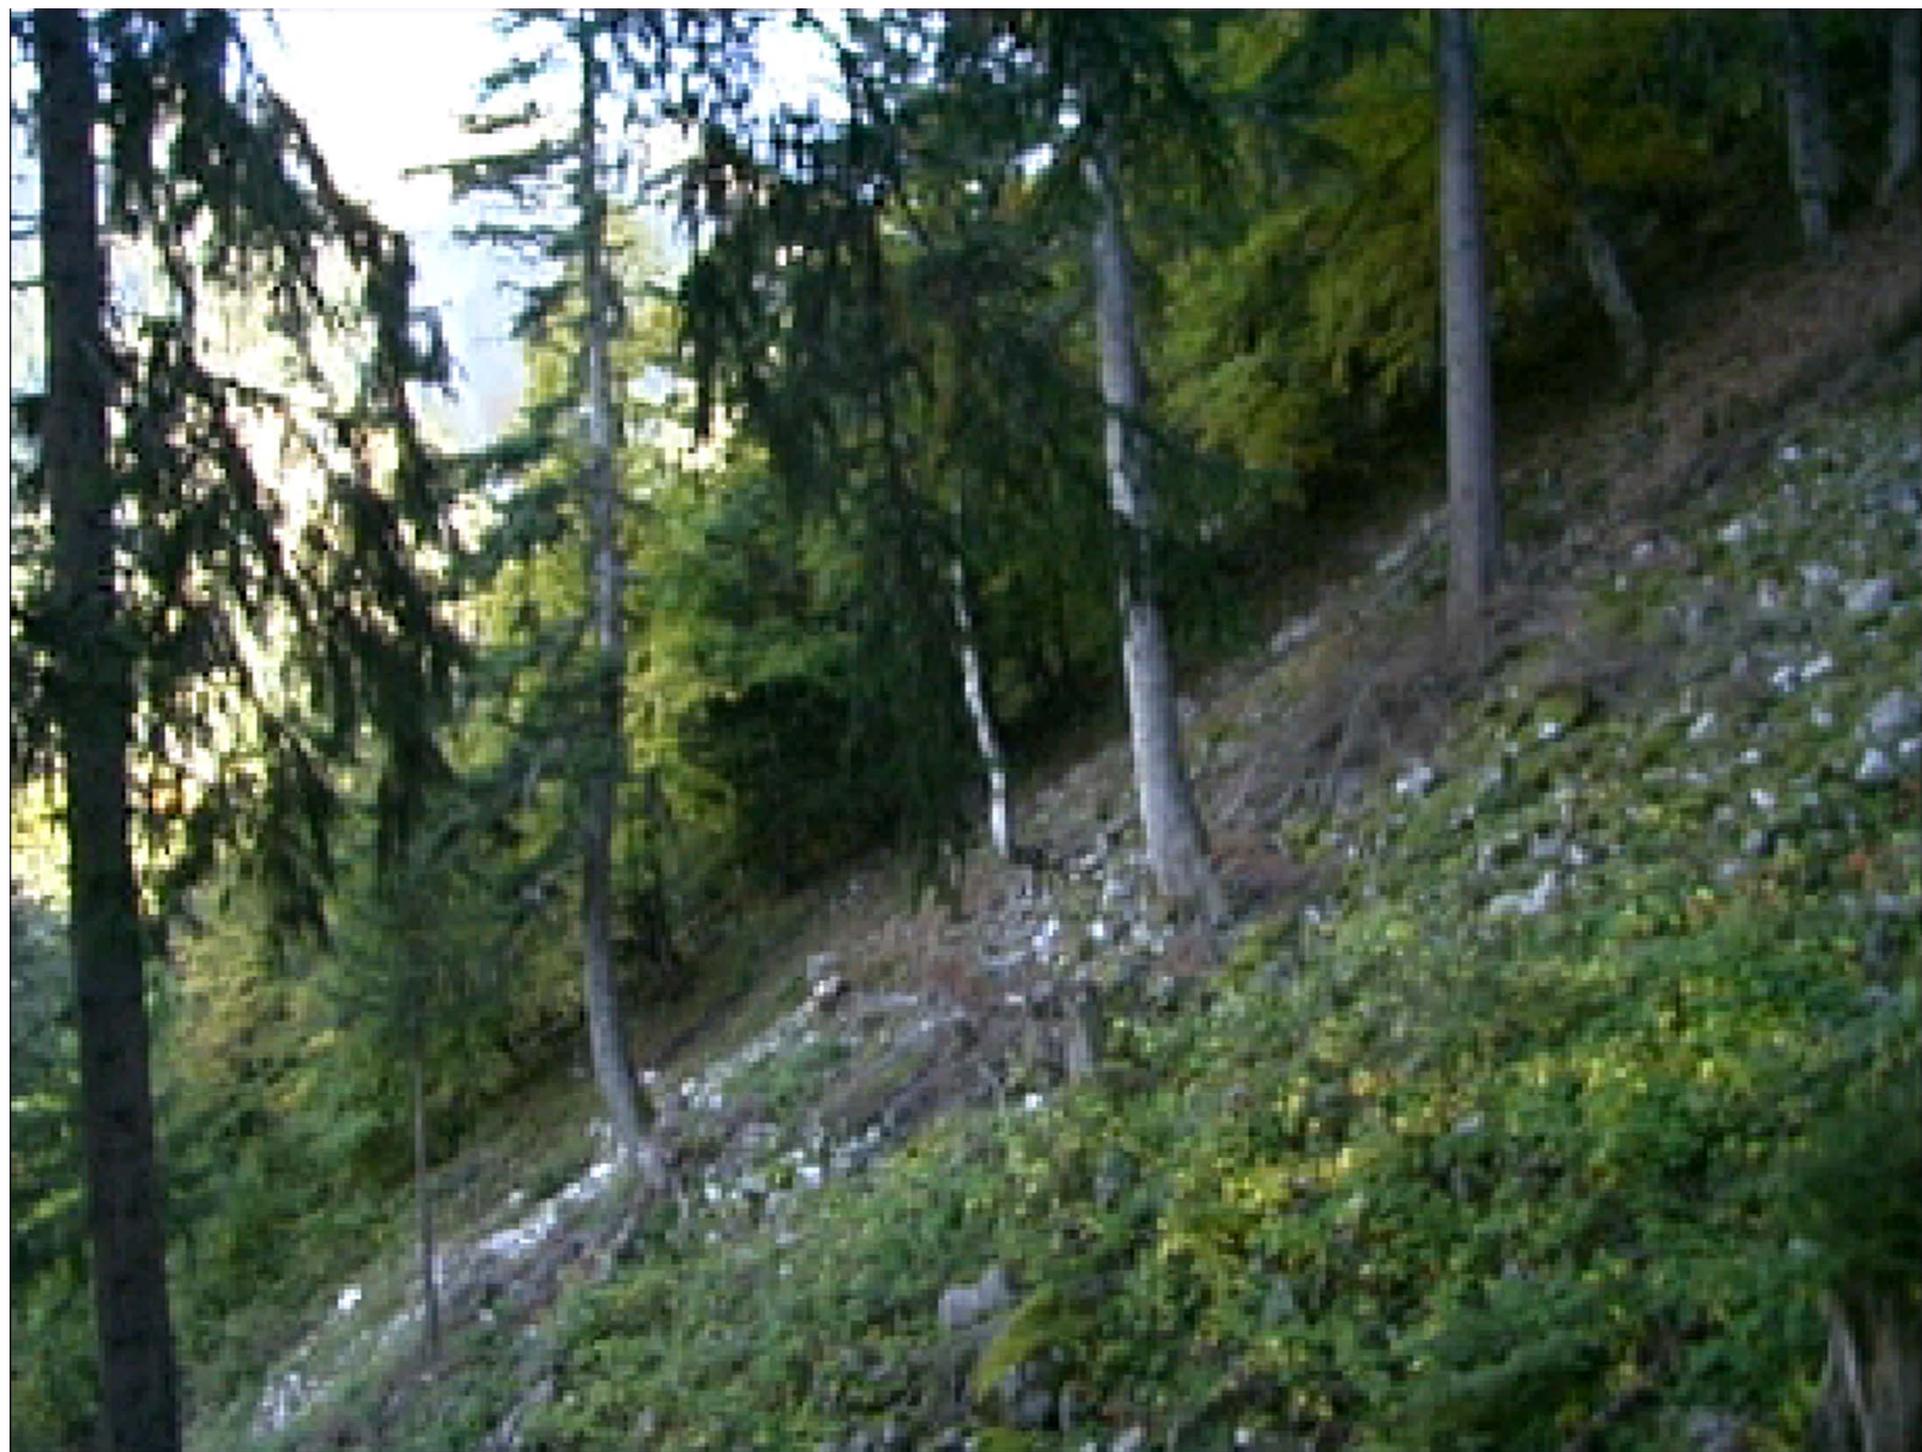

$W_t$ : vitesse de rotation  
 $V_t$ : vitesse de translation

Distribution spatiale des hauteurs,  
des vitesses et des énergies de passage

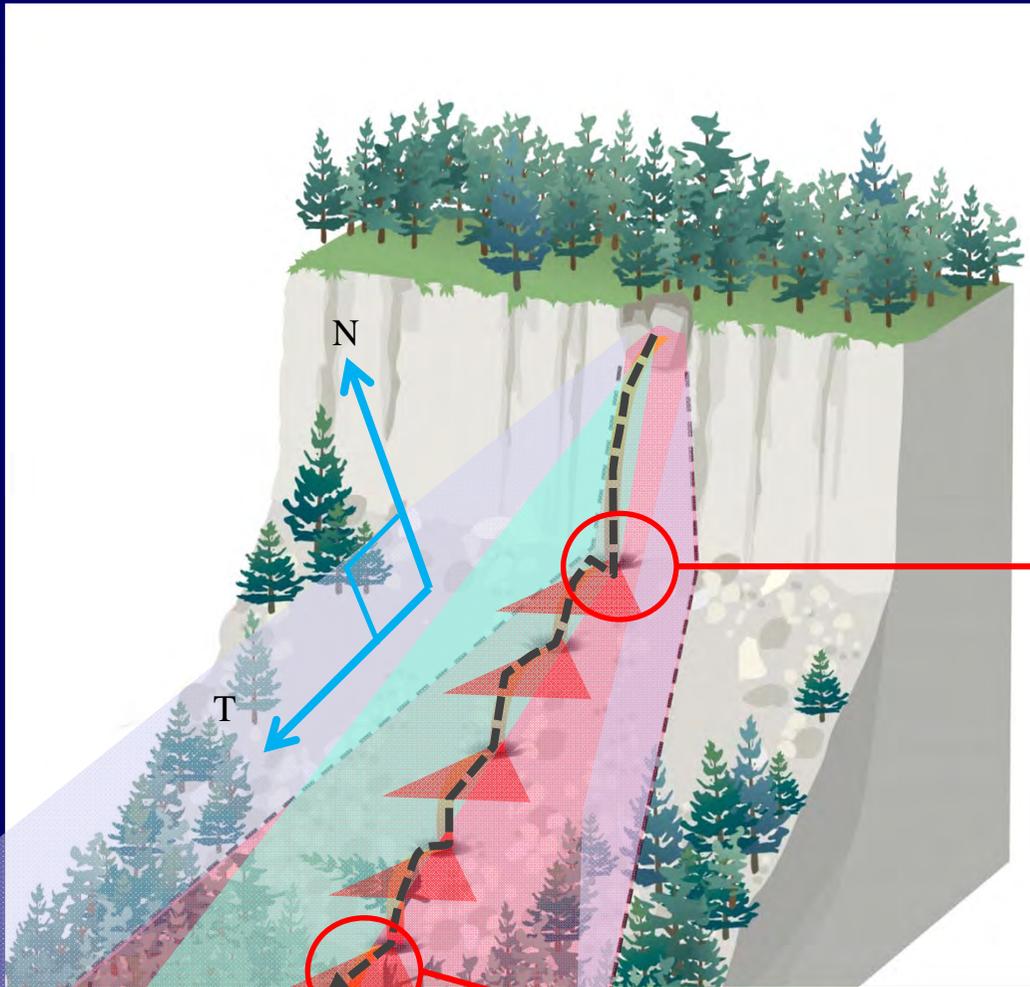

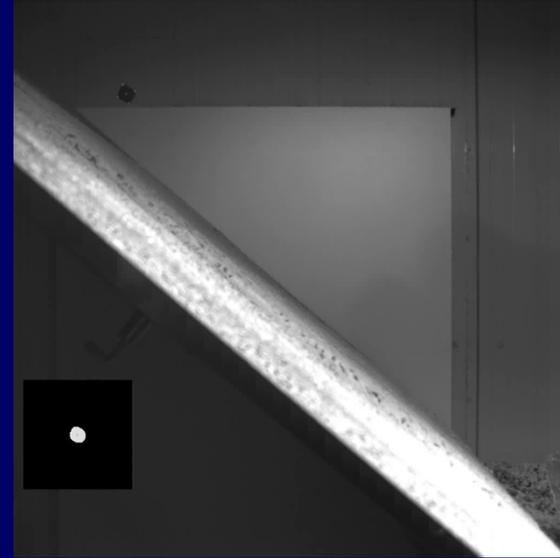

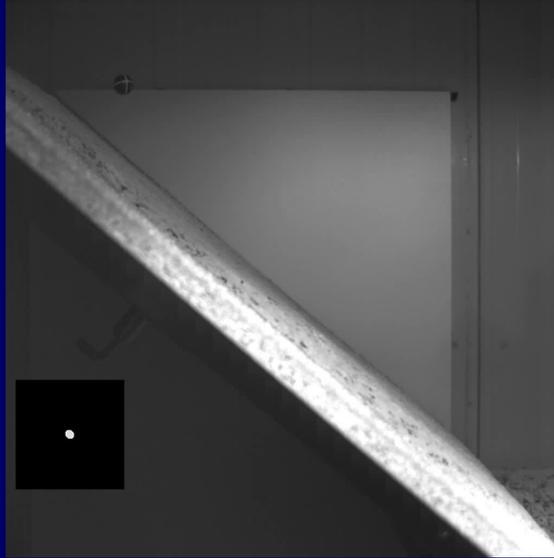

$$V_{\text{réfléchi}} = \alpha * V_{\text{incidente}}$$

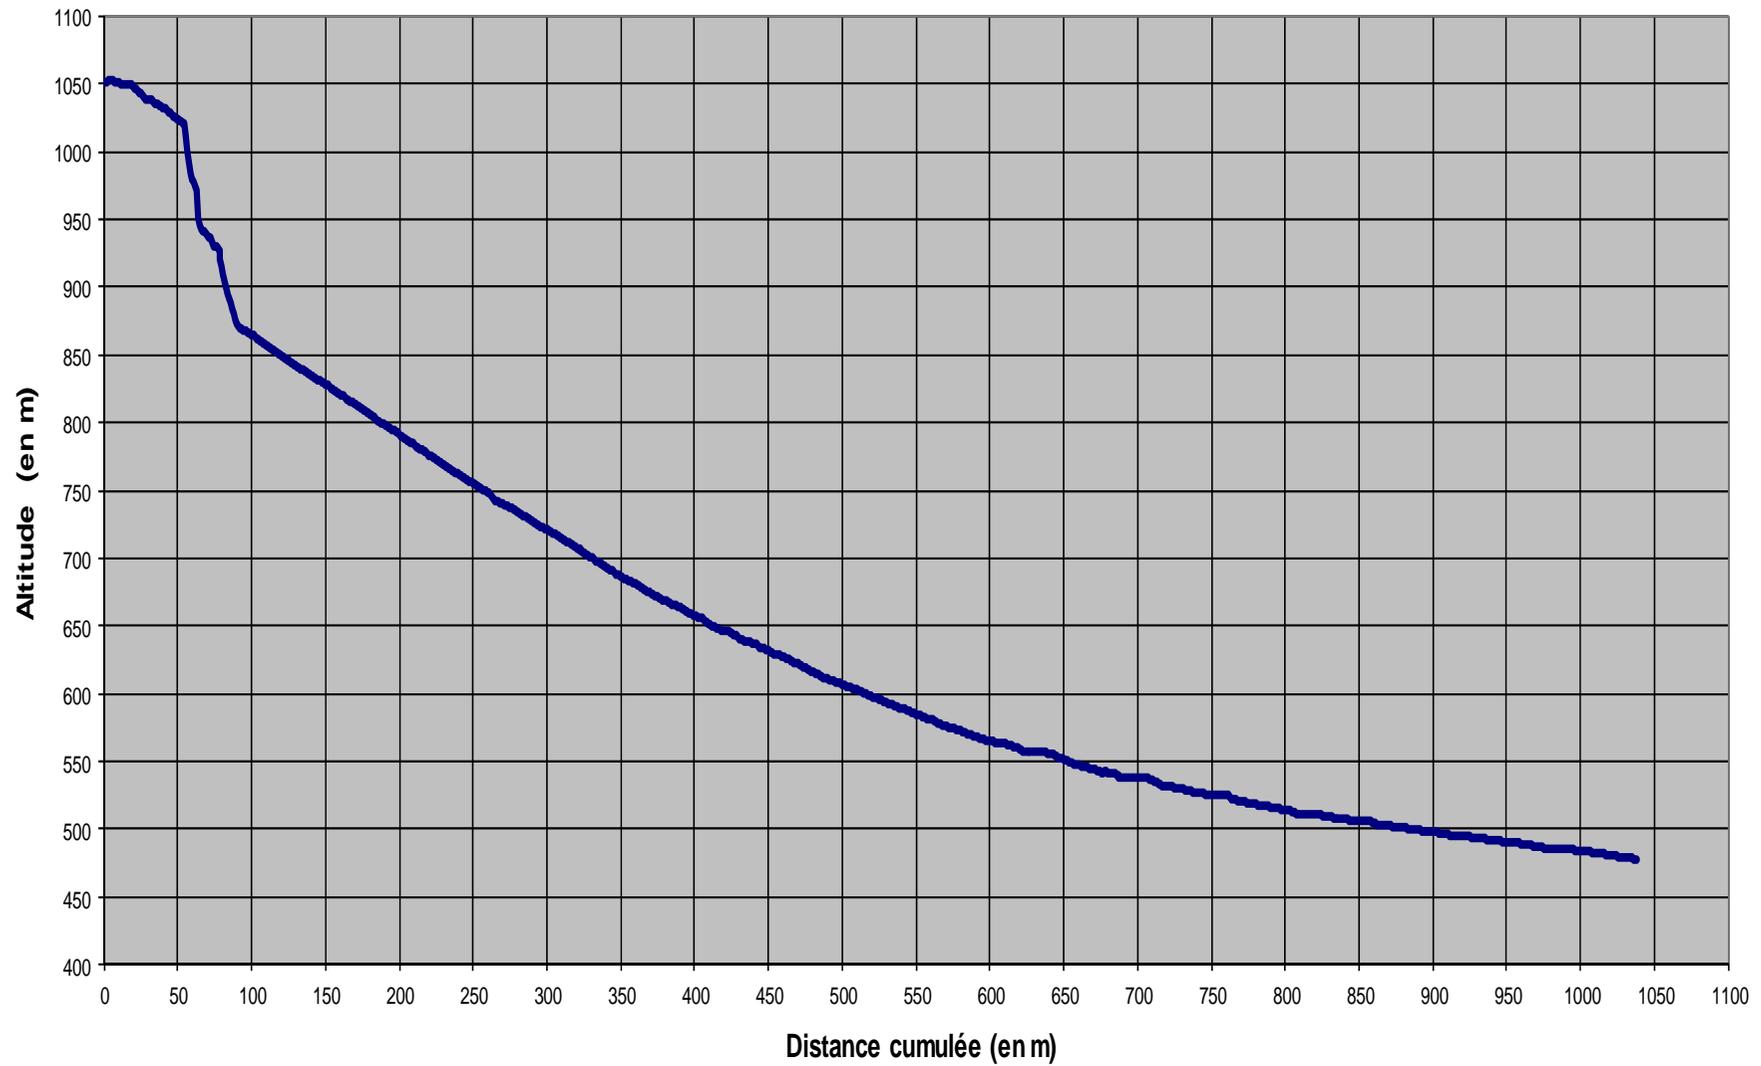

Fonction de la nature du sol , des obstacles,  
du projectile  
(2D, 2.5D, 3D)

Déviations latérales (2.5D, 3D)

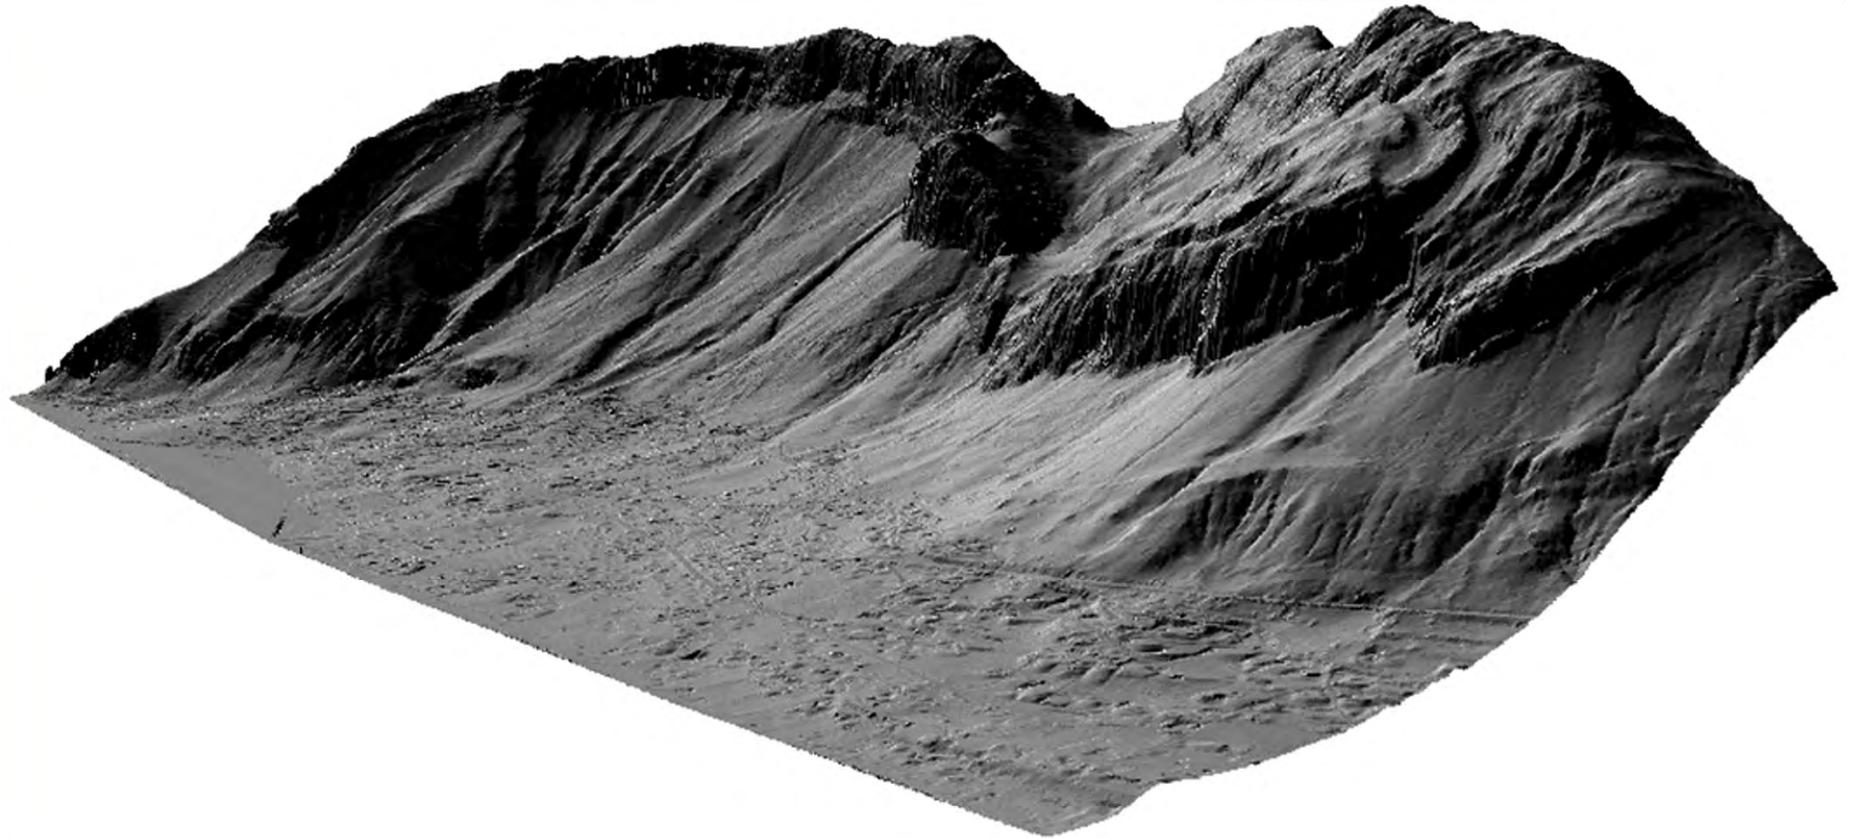

Fonction de la nature du sol , des obstacles,  
du projectile

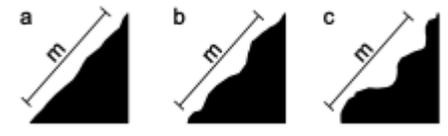

## 2D = profil en long (données discrètes)

**2-2.5 -3D = Modèle Numérique de terrain  
(donnée continue)**
