

EUSALP

ANNUAL FORUM 2020

EUSALP AG8 – Risk Governance

To improve risk management and to better manage climate change,
including major natural risks prevention

Field of action

Risk governance

- Mapping and analysis of Alpine natural hazards - status quo (exchange)
- Comparative studies on the management of residual risk / overload cases, risk governance, forest fires

Adaptation to climate change

- Mapping and comparison of climate adaptation governance systems in Alpine countries (good practice examples and recommendations)
- Climate Change Adaptation Platform for the Alps (CAPA)

Mainstreaming climate adaptation & risk management

- Closer alignment of governance mechanisms in climate adaptation and natural hazard management
- Communication and outreach activities
- Implementing interface module on CAPA

AG8 achievements 2020

- Implementation of **White paper on forest fire** in the Alps in Austria ([Link](#))
- Further development and application of the tool **Natural hazard check** for municipalities
- Continued enhancement of the **Climate Adaptation Platform for the Alps (CAPA)**
- Carrying out an international survey regarding **natural hazard models**
- Preparation of the concept and project start of the cross-sectorial initiative **Climate-resilient spatial planning**

AG8 actions 2021-22

- Transfer of the applicability of the **Natural hazard check** for municipalities from Austria to Bavaria ([website only in German](#))
- Further development, implementation and dissemination of **CAPA** ([website](#))
- **Natural hazard models:** Pedagogical analysis of the survey results and development of prototype, incl.
 - Roadshow stop, 13th October 2021 in Rosenheim (Bavaria)
- Analysis and first draft of the study report for the cross-sectorial initiative **Climate-resilient spatial planning**, incl.
 - Stakeholder Workshop on 15th October 2021 in Vorarlberg (Austria)

Thank you for your attention!
