

For climate change, let's adapt !

Meeting for a cross-border climate strategy

Auron, 31th May, 2022

The Metropole Nice Côte d'Azur is organizing, within the framework of the French presidency of EUSALP, an event dedicated to climate change.

The territory of the Mediterranean Alps, straddling department of Alpes-Maritimes, Piemonte and Liguria is, like the rest of the Alps, subject to a rapid climate change. In a territory severely affected by the storm « Alex » on 2th and 3th October, 2020, adaptation to climate change is of particular importance. It's in this context that the Interreg ALCOTRA ALPIMED CLIMA project is developing a cross-border climate strategy.

The aim of this day is to have participants contribute to this process around the themes of agriculture, tourism and the resilience of territories.
