

INVITATION

The French Association for Natural /
Technological Disasters Risk Reduction

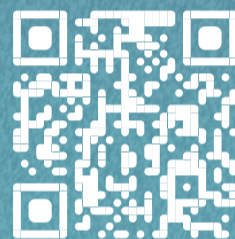

The International Society for
Integrated Disaster Risk Management

The webinar will last on

April 24th 2024 from **Noon to 2 pm** (CET)

connection details to come

registration or scan

Together with their international partners,
from scientific and/or civil society organisations

We are pleased to invite you to a unique webinar

How to make

**« Risk Based Decision Making for All (RBDM) »
work and meet the needs of end users ?**

How to support this objective of the Sendai Framework from
Action in bringing together scientists and practitioners to debate
how to serve end users ?

**A scientist and a practitioner will confront
their concrete respective experiences :**

The GEORISQUES tool in France and the PARATUS EU Project

PROGRAMME

Short welcome address & keynote, by Pr Dr AnaMaria CRUZ,
Chair of IDRIM Society (10 min)

Introduction of the initiative, the session and its context,
by Dr Funda ATUN (IDRIM Society)
and Ing. Roland NUSSBAUM (AFPCNT) (10 min)

**Presentation and comments on an operational widespread service supporting
a specific « risk based decision making » function at use by the French citizens**,
by Nicolas BONNIN, Head of unit, French Ministry of Ecologic Transition,
supervising the webservice development and operations (20 min),

The potential contributions to RBDM objectives of PARATUS EU Project, by the
project coordinator, Pr Dr Cees van WESTEN, University of Twente (NL) (20min)

**Discussion in which each of the two presenters challenges the other one,
with the contribution of the moderators, about how to bridge
the gaps of operability** (20 min)

Debate with the audience (30 min)

Wrap up, concluding remarks and next steps (10 min)

For further information, please consult [the concept note](#) of the webinar. This webinar is open upon registration to any interested party, wherever in the world. Besides the intrinsic interest of discovering and discussing about an original case study relevant to the issue of RBDM, this session raises the attention of every scientist and practitioner committed to the implementation of DRM thinking and capacities. It calls for low-cost-high-value international exchange on good practices through a self developing initiative of webinar presentations and exchanges. If you are curious to learn more, we encourage you to attend the session and perhaps join the initiative.
